

## Devoir 1 Application Distribuees Karen Khoury 220402

<https://github.com/KarenKhou/ApplicationDistrib.git>

Proving my identity : C:\Users\User>prompt KarenKhoury\$G

### Software and version used:

PostgreSQL **16.6**

Java JDK **java version "18.0.2.1" 2022-08-18**

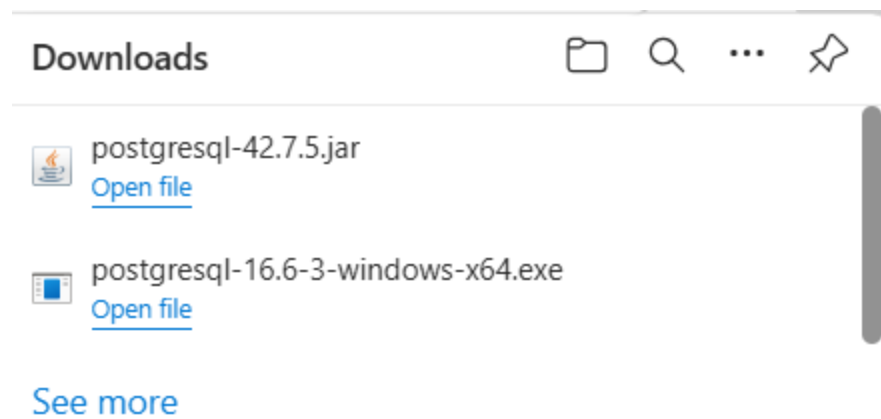

PostgreSQL JDBC Driver **42.7.5**

### **Etape 1:**

Installation de Postgresql

### **Etape 2 :**

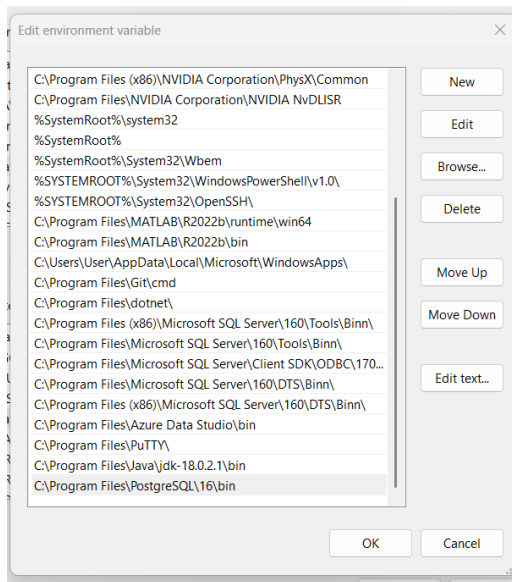

Installation du driver jdbc postgres et le placer dans le fichier de mon project

### **Etape 3:**

Adding psql to my environnement variable path so I can run it from cmd

## Devoir 1 Application Distribuees Karen Khoury 220402

### Success of installation of Postgress 16:

```
KarenKhoury>psql -U postgres
Password for user postgres:

psql (16.6)
WARNING: Console code page (437) differs from Windows code page (1252)
8-bit characters might not work correctly. See psql reference
page "Notes for Windows users" for details.
Type "help" for help.

postgres=# |
```

### Etape 4:

Creer la base de donne dans PosgreSQL

```
CREATE DATABASE ma_base;
```

```
postgres=# CREATE DATABASE ma_base;
CREATE DATABASE
postgres=# \l
```

(4 rows)

## Creation du code Java :

```
import java.sql.Connection;
import java.sql.DriverManager;
import java.sql.ResultSet;
import java.sql.SQLException;
import java.sql.Statement;

public class PostgreSQLJDBC {
    public static void main(String[] args) {
        // Informations de connexion PostgreSQL
        String url = "jdbc:postgresql://localhost:5432/ma_base";
        String user = "postgres";
        String password = "karen";

        // Connexion à PostgreSQL
        try (Connection conn = DriverManager.getConnection(url, user, password);
            Statement stmt = conn.createStatement();
            ResultSet rs = stmt.executeQuery("SELECT version();")) {

            // Affichage des résultats
            while (rs.next()) {
                System.out.println("PostgreSQL Version: " + rs.getString(1));
            }

        } catch (SQLException e) {
            e.printStackTrace();
        }
    }
}
```

## Devoir 1 Application Distribuees Karen Khoury 220402

- 1) Créer le nouveau fichier pour le project
- 2) Placer le JDBC .jar file dans ce fichier
- 3) Copier Coller le code procurer par ChatGPT
- 4) Compiler : `javac -cp ".;postgresql-42.7.5.jar" PostgreSQLJDBC.java`
- 5) Run avec : `java -cp ".;postgresql-42.7.5.jar" PostgreSQLJDBC`

```
at PostgreSQLJDBC.main(PostgreSQLJDBC.java:13)
PS C:\Users\User\Desktop\karen\Universite-Etudes\Semestre 8\Application distribuees\jdbcpostgresDevoir1> javac -cp ".;postgresql-42.7.5.jar" PostgreSQLJDBC.java
PS C:\Users\User\Desktop\karen\Universite-Etudes\Semestre 8\Application distribuees\jdbcpostgresDevoir1> java -cp ".;postgresql-42.7.5.jar" PostgreSQLJDBC
PostgreSQL Version: PostgreSQL 16.6, compiled by Visual C++ build 1942, 64-bit
```

SUCCES DU CODE !

Nous avons fait `SELECT version();`

PS C:\Users\User\Desktop\karen\Universite-Etudes\Semestre 8\Application distribuees\jdbcpostgresDevoir1> java -cp ".;postgresql-42.7.5.jar" PostgreSQLJDBC

PostgreSQL Version: PostgreSQL 16.6, compiled by Visual C++ build 1942, 64-bit
