

Karen Khoury 220402

PARTIE 3 : TP JPA Servlet

Github repo : [KarenKhou/ApplicationDistrib](https://github.com/KarenKhou/ApplicationDistrib)

```
System.out.println("Employee persisted with ID: " + e.getId());

// Retrieve employee from the database
TypedQuery<Employee> query = em.createNamedQuery(s: "Employee.findById", Employee.class);
query.setParameter(s: "id", e.getId());
Employee e1 = query.getSingleResult();

return "Saved employee: " + e1.getName() + " with salary: " + e1.getSalary();
} catch (Exception ex) {

return "Failed to retrieve Employee.";
}
}
```
